This test(s) was performed using a kit that has not been cleared or approved by the FDA. The analytical performance characteristics of this test has been determined by Quest Diagnostics Nichols Institute, Valencia, CA. This test and any food specific allergen IgG result, should not be used for the diagnosis of allergic or atopic disease states (except for sensitivity to milk in neonates and gluten sensitivity). The use of food specific allergen IgG results should be restricted to the assessment of response to therapeutic interventions.
