Clinical Info:

Test Name	Result	Flag	Reference Range	Lab
<b>PSA, TOTAL</b>				
PSA, TOTAL	0.3	NORMAL	< OR = 4.0 ng/mL	01

The total PSA value from this assay system is standardized against the WHO standard. The test result will be approximately 20% lower when compared to the equimolar-standardized total PSA (Beckman Coulter). Comparison of serial PSA results should be interpreted with this fact in mind.

This test was performed using the Siemens chemiluminescent method. Values obtained from different assay methods cannot be used interchangeably. PSA levels, regardless of value, should not be interpreted as absolute evidence of the presence or absence of disease.
